SDG Announces RevenueVision® 16

Warrenton, VA – December 12, 2014 — The Solution Design Group, Inc. (SDG) a leading developer of cloud-based solutions for the higher education and public sector markets is pleased to announce the latest release of its RevenueVision® technology. RevenueVision® 16, now available for all subscribers and new customers, brings improved search capabilities, a new sales tax feature, enhanced document management and statistics improvements.

“RevenueVision® 16 offers some great productivity enhancement features including the ability to email attached documents from within RevenueVision and the ability to create a new contract record based on an existing one. Many of the new features in each release are actually suggested by our customers and our Agile development methodology allows us to get new features and functions to our customers frequently,” said Tom Strange, SDG CEO.

RevenueVision® 16 arrives with new features including:

- **Improved Search Capability** – the Global Search feature will now return Status information for Contracts and Organizations.
- **New Sales Tax Feature** – users can now identify a sales tax Transaction Type and associate it with other Transaction Types. Whenever a Contract Register or Invoice Line entry is created, the tax line will be automatically calculated and added.
- **Enhanced Contract Management Capabilities** – A new feature allows a user to take a Contract and "make a copy." When pressing the copy button a new Contract edit screen will open with a copy of the existing contract, including dates, provisions and transaction templates. The user can then edit the Contract header information and save the new Contract.

RevenueVision® is transforming the way colleges and universities operate auxiliary and business enterprises. Through increased efficiency, software enabled standardization, and reduction of errors and omissions, institutions can anticipate a return on investment that exceeds 150% annually.

About RevenueVision®

RevenueVision® is a web based “software as a service” solution that has been designed and developed specifically for the higher education community to optimize the management of auxiliary enterprise relationships. RevenueVision® is available on a monthly or annual subscription basis directly from SDG. (www.revenuevision.com)
